

FLAME RESISTANT / SOFTSHELL ELEMENTS™ JACKET – TACTICAL

You can haul around a traditional hard shell parka and bulky fleece jacket to stay warm and dry, or you can get the weather and flame protection you need in one comfortable Elements softshell jacket. Massif's proven FR jacket keeps you dry in all but the wettest cold weather conditions.

The three-layer fabric construction features an abrasion-resistant exterior, a windproof, waterproof, breathable membrane, and a soft fleece interior. The membrane keeps rain out but allows moisture vapor to escape when you're working up a sweat. Four-way stretch ensures your Elements jacket moves with you every step of the way.

MADE IN THE USA

FEATURES

FIRE AND ICE LAYERING SYSTEM – OUTER LAYER

MASSIF® FLAME RESISTANT TECHNOLOGY

Elements fabric passes the stringent ASTM D 6413/F2302-03 international standard for flame resistance. Elements fabric exceeds flame and heat resistance performance requirements specified in the Radiant Protective Performance, Flame Resistance, and Heat and Thermal Shrinkage Resistance tests contained in the NFPA 1977-2005 protective clothing standard.
