

FR FLAME RESISTANT

FLAMESTRETCH[®] SOCK SYSTEM

ELITE PROTECTION SYSTEMS

Donned primarily by cold-water rescue divers, the Flamestretch Sock System is designed to be worn under dry suits when warmth and FR protection is critical. The Flamestretch[®] sock system is comprised of two socks. The inner sock liner by Darn Tough[®] Wool is low-profile, comfortable, provides excellent moisture management, and is warm when wet. The over-sock constructed with Massif Flamestretch[®] fabric is highly breathable yet traps enough heat to keep your feet warm in the harshest conditions.

FEATURES:

- Flat seam construction with proprietary 4-way stretch Massif[®] fabric
- High warmth-to-weight ratio
- Warm when wet
- Excellent moisture management
- Authorized by the U.S. Coast Guard
